

NEW

## NEW SF-ROLLER RETAINING BRAKE

Installation with RA

Installation with raised plate

**The Timber Roller family incorporates a new retaining brake with the following features:**

- It has a system that retains the sliding door keeping it closed.
- It contains a rubber stop that dampens the closing of the sliding door when arriving at the end of its route.
- It is compatible with the upper Roller profile.
- It is available for installations with raised plate or with the RA system.

**New - 015C**
