

## SF-MULTIPLO ROLLER T. PROG.

Discover the new **SF-MULTIPLO ROLLER T. PROG.** system from Saheco. The system allows two panels up to a maximum weight of 70Kgs each, to open and close together with a progressive telescopic action. The two panels can open either to the left or to the right.

The system enables a maximum clear opening width of 3000mm.

As an important innovation, this system also incorporates **Saheco's Softbrake technology** which adds an aesthetically pleasing action to the functionality to the system, and at the same time providing a safety feature by preventing trapped fingers etc on the closing cycle.
