ES

SV-Roller + Softbrake es un sistema de puertas correderas de cristal suspendidas, sin marco y de alta calidad. Ideal para divisiones y puertas de uso doméstico o comercial de peso ligero o medio.

CARACTERÍSTICAS
Solución para hojas de hasta 80 kg. Completa ocultación del mecanismo dentro del perfil superior, y parte inferior del mismo plana; lo cual ayuda a la mejora de la integración del sistema en el espacio. Asimismo, el nuevo softbrake (freno amortiguador) también queda integrado dentro del perfil y puede ser implementado a uno o ambos lados de la puerta proporcionando suavidad y acompañando a la puerta hasta su posición final sin que ésta retroceda. Si se desea realizar una instalación con amortiguación a un lado, el ancho mínimo de la puerta deberá ser de 650mm, mientras que si se prefiere a ambos lados deberá ser de 850. SV-Roller se instala en tres versiones distintas, con las pinzas SV-Roller Large A80, SV-Roller Minimal 80, o SV-Roller Easy Large A80.

EN

The SV-Roller + Softbrake is a system of high quality, frameless, suspended glass sliding doors. Ideal for lightweight and medium weight dividers and doors for home or commercial use.

FEATURES
A solution for panels of up to 80 kg. Complete concealment of the mechanism within the top track and part of the bottom flat part itself; which helps the system integrate better into the area. In addition, the new Softbrake (damping brake) is also built into the track and can be implemented on one or both sides of the door to provide softness and accompanying the door to its final position without backing up. If the intention is to perform an installation with damping on one side, the minimum width of the door must be 650mm, while if the preference is for both sides, it needs to be 850mm. The SV-Roller system can be installed in three different versions, with the SV-Roller Large A80 clamps, with the SV-Roller Minimal A80 clamps and with the SV-Roller Easy Large A80 clamps.

FR

SV-Roller + Softbrake est un système de portes coulissantes en verre suspendues, sans encadrement et de qualité supérieure. Idéales pour les divisions et portes à usage résidentiel ou commercial de poids léger ou moyen.

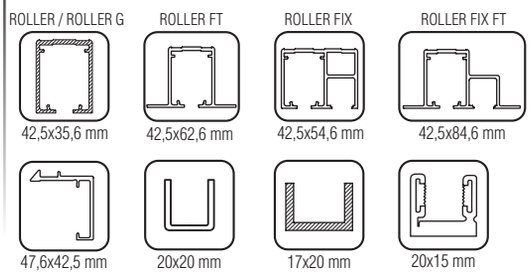

CARACTÉRISTIQUES
Solution pour battants de jusqu'à 80 kg. Masque complètement le mécanisme dans le profil supérieur tandis que la partie inférieure de ce dernier est plate, pour une meilleure intégration du système dans l'espace. De même, le nouveau Softbrake (frein amortisseur) se fond dans le profil et peut être installé sur un ou les deux côtés de la porte de manière à l'accompagner jusqu'à sa position finale en douceur et sans qu'elle ne recule. Si l'on souhaite une installation avec amortissement d'un côté, la largeur minimale de la porte doit être de 650 mm, tandis que si l'on préfère des deux côtés elle doit être de 850 mm. SV-Roller est installé dans trois versions différentes, avec les pinces SV- Roller Large A80 , SV-Roller Minimal 80 ou SV-Roller Easy Large A80.
